Summary

Junior software developer with internship and team project experience in Australia. Worked on web applications using React and Django and developed Python image analysis software for medical research. Seeking a developer role to contribute to projects and learn from experienced developers.

Technical Knowledge

- Languages: JavaScript, TypeScript, HTML, CSS, Python, R
- Frameworks & Libraries: React, Next.js, Tailwind CSS, Django
- Development Tools: Docker, VS Code, Codex, Claude Code, Git, GitHub

Education

Master of Professional Engineering (Software Engineering)	Jul 2024 – Jul 2026
The University of Western Australia, Perth, Australia	
Bachelor of Computer Science and Technology	Oct 2020 – Jun 2024
Heilongjiang University of Science and Technology, Harbin, China	

Employment History

Lions Eye Institute, Perth, Australia	Feb 2025 - Jun 2026
Software Engineer Intern	Feb 2025 - May 2025; Nov 2025 - Feb 2026
• Automating image formatting and file renaming using Python to prepare datasets for processing. • Migrating components of an existing image-analysis application from MATLAB to Python. • Implementing calculation logic and integrating results into the application's user interface. • Debugging processing workflows and updating features based on researcher feedback.	
Achievement: Reduced processing time from around 60 seconds to under 30 seconds by optimising processing algorithms.	

Research Assistant, UWA Thesis Project	Jun 2025 - Oct 2025; Feb 2026 - Jun 2026
• Continuing to develop OCTAVA as part of a master's thesis project, building on previous internship work. • Reviewing research needs and existing approaches to define the requirements for a new software module. • Developing a new analysis module within the existing Python application while maintaining its original functionality. • Updating the user interface with adjustable settings and controls for selecting analysis regions and viewing results. • Reusing existing application components and integrating the new module with result displays and file exports. • Comparing alternative algorithms using test data and testing the complete workflow from input to export.	
Achievement: Delivered the new OCTAVA analysis module and completed the master's thesis and final defence.	

Volunteer Work

International Student Ambassador	Dec 2024 – Aug 2026
StudyPerth, Perth, Australia	
Delivered orientation presentations to new international students and worked with staff on student engagement activities.	
Student Advisory Committee Member	Jul 2025 - Oct 2025
The McCusker Centre for Citizenship, Perth, Australia	
Shared internship experiences during alumni panel presentations and provided individual guidance to students at events.	

Personal Attributes

- Communication: Discussed requirements with clients and colleagues, explaining design decisions and demonstrating software features during weekly team meetings.
- Collaboration: Worked with other developers to complete application features by connecting frontend interfaces to backend APIs and resolving merge conflicts together.
- Adaptability: Learned unfamiliar medical concepts through independent research to understand project requirements and how the software would support researchers' work.
